Notes:

*There is a minimum charge of £40 irrespective of area.

If your boat does not appear in the above schedule the seasonal cost is calculated by the following:

Overall Length (metres) X Beam (metres) = Area (m²) : round to nearest sq.m then X £8.50 = cost
 e.g : Length 5.4m x Beam 2m = 10.8m² : round this to 11m² (nearest m²) then x £8.50 = £93.5 to pay
